

Sustainability Day

Tuesday October 10th 2017

A new generation of chemical fertilizers manufactured from waste streams rapidly makes its way into Dutch agriculture, enabling our farmers to add high sustainability to their enviably high productivity in a fast and effective way.

Come and learn about economics, precision agriculture, technological, ecological and legislative aspects of this important development and become inspired!

LOCATION: ORION BUILDING, WAGENINGEN CAMPUS

MORNING

LECTURE ROOM

Orion

- | | |
|--------------|---|
| 09.30- 09.45 | Welcome by prof. dr. E.C. Van Ierland, Wageningen University and Research (WUR)
Department Environmental Economics and Natural Resources |
| 09.45-10.15 | Opening adress by the Chairman of Nutrient Platform
Ambition 2018 : Realizing the circular economy |
| 10.15-10.45 | Succes stories of nutrient recycling by members of Nutrient Platform
W. de Buck Nutrient Platform |
| 10.45-11.00 | The future of nutrients in our Environment
prof. dr. C. Kroeze, Environmental Sciences (WUR) |

BREAK

Posters: Nutrient Platform, Green N fertilizers, Smart Fertilization, Physiostart Plus

- | | |
|-------------|--|
| 11.15-11.45 | Smart Placement of circular plant nutrients for improving soil quality and yields
Taskforce Smart Placement of Smart Fertilization Organisation (SFO) |
| 11.45-12.30 | Potatoes : Fertilization with recycled phosphate fertilizer
M. Raaphorst, Plant Nutrition Specialist at Timac Agro NL (Groupe Roullier) |

AFTERNOON

LECTURE ROOM

Orion

- | | |
|-------------|--|
| 13.30-14.00 | Air scrubbers, operation and developments in supply and demand of nitrogen
